

Keeping Los Angeles Covid Free

EPA & FDA Approved to kill COVID-19
Prices as low as \$299

Puriize is a full service sanitation company.
We use an EPA & FDA approved solution to kill
COVID-19 and other germs keeping both commercial
and residential clients Positively Clean.

Call Belinda Haller (213) 349-4042

The Puriize Process

Activate: The Puriize disinfectant solution works at low concentration levels and achieves high-level disinfection safely.

Spray: Our technicians spray an electrostatically charged fine mist that upon contact, creates a wrap around effect disinfecting the entire object or surface. We can cover up to 2,000 square feet in 30 minutes.

Wait: Allow the solution to act for 20 minutes for a Positively Clean environment.

We use industry-leading electrostatic sprayers paired with a hospital-grade solution that disinfects surfaces within minutes.

The Puriize Advantage

We use the safest, most effective product on the market. The Puriize disinfectant solution contains no carcinogens or poisonous residuals. It's safe and gentle enough to be used around house plants, children's toys, and on food surfaces.

Your safety is our top priority!
